Reroutes in Mt Crawford forest

The Heysen Trail has been re-routed in Mt Crawford forest in three places:

- 1 The main trail (which is the route along the southern then eastern side) has been re-routed off of Chalks Road
- 2 The alternative trail (which is the route along the north-western side) has been re-routed via Warren Reservoir to Centennial Drive
- 3 When the South Para River water level is high, avoid the main trail crossing (marked 3 upstream to the east) and walk 900m downstream to cross the river on the Mount Rd bridge (marked 4 downstream to the west)
